Re: Woodford Street Sewer Separation Project - PAVING

Dear Resident:

The Department of Public Works would like to update you on the status and activities regarding the above referenced project. The schedule for this work is highly weather dependent, but I wanted to lay out what the plan is because we will have a large “No Parking” posting for the paving, in your area.

Paving within the project limits on Woodford Street is currently scheduled for Wednesday, September 4th, 2019. In the event of inclement weather in the days prior to the paving, the schedule may be pushed back as any weather system affects the regional paving schedule. If this is the case, please make sure to read any changes to the signs posted on the street and refer to the City’s Public Works website.

“No Parking” signs will be posted the entire length of the street for “No Parking” from 7:00 AM to 7:00 PM. It is the intent to pave the entire street. You will be towed if your car is on the street. You will also not have easy access to your driveways. After pavement is placed, it needs to be rolled and cooled before cars will be allowed on it. The paving machine is a moving target and we cannot tell you exactly at what time your driveway will be impacted but you may be asked to wait for approximately 15 minutes before you are allowed to cross the pavement from your driveway. The paving of the driveway aprons will either occur that day or in the days following.

We ask that you observe and respect the flaggers and any traffic directional changes as we progress. Traffic will be detoured around the project limits by flaggers for the day.

Mr. Rick Day of Sebago Technics will be onsite to serve as the City’s inspector during the paving.

Thank you for your patience during this project, if you have any questions, please feel free to contact me at 874-8840.

Sincerely,

Bradley A. Roland, P.E.
Senior Project Engineer
